### GOLD FROM THE ANCIENT WORLD

The Ancient gold coins described below provide a good introduction to this exciting area of numismatics. The pieces are truly masterpieces in miniature, engraved by the finest artisans who were able to fashion in small spaces finely engraved images in high relief, capturing the heraldic majesty of a city emblem or the often brutally realistic features of contemporary kings and emperors. THE SUPREMELY RARE  
1938 CZECHOSLOVAKIA  
10 DUCAT

78

Stock #

Price

- 78 10 Ducats, 1938. Types as above. Fr.4. One of the classic rarities of the entire gold series. The coin has an interesting and colourful history. Struck just prior to the German invasion of Czechoslovakia, the mintage of this issue has been confused by authors since the early 1970's. Krause-Mishler lists the mintage at 192 pieces, but Jaeger and Pick listed the mintage at 34 pieces in the 1970 catalogue of coins and banknotes of Czechoslovakia. It is quite probable that KM has switched the mintages for the 1937 and 1938 10 Ducat coins and that the actual mintage of the 1938 issue is 34 pieces. Either way, this issue is a great rarity and one of the last gold coins to be struck on the eve of World War II. Brilliant Uncirculated and of gem quality.

ANOTHER GREAT RARITY  
THE 1951 CZECHOSLOVAKIA  
10 DUCAT

79

Stock #

Price

- 79 10 Ducats, 1951. Types as above. Fr.4. An excellent companion to the preceding piece in terms of rarity. The coin was the last issue of the old type in use from 1929 through 1938. KM lists the mintage of this issue as 100 pieces, while Jaeger and Pick listed the mintage at 150. In keeping with the reasoning employed on the 1938 issue, it is this cataloguer's contention that Jaeger and Pick are most probably correct and that the actual mintage is 150 pieces. Nonetheless, the rarity of this issue is well established. Brilliant Uncirculated and a gem.

Under the terms of the Lateran Treaty of 1929, the State of Vatican City has the right to issue coinage in its own name denominated in Italian Lira.
